

How FAIRMODE can help ReportNet3

Agenda

- 9:00-9:30: Introduction
 - Air Quality e-Reporting schema in ReportNet3: Overview of documentation requiring guidelines from FAIRMODE (EEA)
 - How FAIRMODE can help the ReportNet3 process. Focus on document templates, and future interactions on reporting guide and code list/nomenclature (JRC)
- 9:30-10:50: Templates discussion
 - Spatial representativeness (10' ppt +10' discussion on small groups + 20' plenary)
 - Assessment (10' ppt +10' discussion on small groups + 20' plenary)
- 10:50-11:00: Conclusions and next steps

Agenda

- 9:00-9:30: Introduction
 - **Air Quality e-Reporting schema in ReportNet3: Overview of documentation requiring guidelines from FAIRMODE (EEA)**
 - How FAIRMODE can help the ReportNet3 process. Focus on document templates, and future interactions on reporting guide and code list/nomenclature (JRC)
- 9:30-10:50: Templates discussion
 - Spatial representativeness (10' ppt +10' discussion on small groups + 20' plenary)
 - Assessment (10' ppt +10' discussion on small groups + 20' plenary)
- 10:50-11:00: Conclusions and next steps

Agenda

- 9:00-9:30: Introduction
 - Air Quality e-Reporting schema in ReportNet3: Overview of documentation requiring guidelines from FAIRMODE (EEA)
 - **How FAIRMODE can help the ReportNet3 process. Focus on document templates, and future interactions on reporting guide and code list/nomenclature (JRC)**
- 9:30-10:50: Templates discussion
 - Spatial representativeness (10' ppt +10' discussion on small groups + 20' plenary)
 - Assessment (10' ppt +10' discussion on small groups + 20' plenary)
- 10:50-11:00: Conclusions and next steps

FAIRMODE can help this process

- Support the ReportNet3, providing templates for the required documentation -> as a community, we can help the persons responsible with the ReportNet3 process
- These templates need to be seen as a link between the modelling and reporting community at country level (meta information complementing the submitted data sets)
- We work on simple templates
 - It is a comprehensive picture of what you need for a certain modelling application
 - index of what to include
 - Linking to AAQD and related «implementing acts»
 - Other docs are available on this (i.e. «Technical support document on the use of modelling for various application domains under the AAQD» -> avoid reinventing the wheel)
- Templates are not compulsory for users, but can be used as guidelines
- We work in an «abstract way» considering main modelling applications
- «Reporting Guide» and «code list» -> entry points to solve some issues now in the ReportNet3

Where can AQUILA & FAIRMODE help?

Lists the documents requested in different tables

Documentation

Relevant tables for AQUILA

Relevant tables for FAIRMODE

Where can FAIRMODE help?

Lists the documents requested in different tables

Documentation

Relevant tables for FAIRMODE

ReportNet3 required documentation

Tables for:

- PollutionAdjustmentLevel
- ModelObjectiveEstimation
 - Assessment
 - Adjustments
 - Scenario
 - Spatial Representativeness
- CompliancePlanLink
- Source Apportionment

Difficult to address all these items independently

So in this session we focus on:

- Abstract layer between ReportNet3 and FAIRMODE
- Also because of time constraints, we focus today on Modelling applications (**DataQuality** and **Method**) for:
 - Spatial representativeness (Template 1)
 - Assessment (Template 2)

Agenda

- 9:00-9:30: Introduction
 - Air Quality e-Reporting schema in ReportNet3: Overview of documentation requiring guidelines from FAIRMODE (EEA)
 - How FAIRMODE can help the ReportNet3 process. Focus on document templates, and future interactions on reporting guide and code list/nomenclature (JRC)
- 9:30-10:50: Templates discussion
 - **Spatial representativeness (10' ppt +10' discussion on small groups + 20' plenary)**
 - **Assessment (10' ppt +10' discussion on small groups + 20' plenary)**
- 10:50-11:00: Conclusions and next steps

Agenda

- 9:00-9:30: Introduction
 - Air Quality e-Reporting schema in ReportNet3: Overview of documentation requiring guidelines from FAIRMODE (EEA)
 - How FAIRMODE can help the ReportNet3 process. Focus on document templates, and future interactions on reporting guide and code list/nomenclature (JRC)
- 9:30-10:50: Templates discussion
 - Spatial representativeness (10' ppt +10' discussion on small groups + 20' plenary)
 - Assessment (10' ppt +10' discussion on small groups + 20' plenary)
- 10:50-11:00: **Conclusions and next steps**

Next steps

- Templates to be ready by March 2026 ?
- Today we discussed spatial representativeness and assessment
 - Share docs in the next months for your further feedback
- Need also to address other modelling applications
 - Adjustments
 - Scenarios/plans
 - ...
